Mr Cleveland on Silver.

New York, Feb. 12.—The Reform
club meeting in opposition to the
free coinage was held last night at
Cooper Union and was attended by
about 600 persons. The resolutions
against unlimited coinage of silver
passed and ex-Secretary Cleveland
made an address. Among the let-
ters of regret was one from a pres-
ident Cleveland in which he says:

I shall not be able to attend and
address the meeting as you request
but I am glad that the business in-
terest of New York are at last to be
heard on the subject. It surely
cannot be necessary for me to make
a formal expression of my agree-
ment with those who believe that
the greatest perils would be in-
flicted by the adoption of the scheme
embraced in the measure now pend-
ing in congress for an unlimited
coinage of silver at our mints. If
we have developed an unexpected
capacity for the assimilation of a
largely increased volume of currency
and even if we have demonstrated
the usefulness of such an increase
these conditions fall far short of in-
suring us against disaster if in the
present situation we enter upon the
dangerous and reckless experiment
of free unlimited and independent
silver coinage.

ITS EFFECTS IN WASHINGTON

The letter of ex-president Cleve-
land in which he again so emphati-
cally announces himself against free
coinage; was the universal comment
at the capital to-day. It was an-
grily commented upon by the Southern
and Western Democrats, and there
were few of any faith who did not
believe it an opportunity. Mr.
Bland who represents the head of
the silver movement said: "This
letter means that either the west-
ern democrats must cut loose from
Grover Cleveland or abandon free
silver. They will not do the latter.

This was the general opinion of
Democratic members from the west.
The eastern democrats from Penn-
sylvania, New York and the New
England states, approved the letter
and representative Wilcox, Tracy,
Vaux, Keer and Mutchler endorsed
it. The latter was formerly a mem-
ber of the coinage committee. He
said: "This letter only shows the
consistency of Grover Cleveland.
His political strength in the west
and south is over estimated. The
tariff and not silver will be the next
issue in the campaign

Mr. Vaux whose expressions are
always forcible, remarked: "This
letter is sublime patriotism.

Representative Breckenridge of
Kentucky was among the few
of the southern members who be-
lieved that the letter would not in-
jure the ex president in that sec-
tion. He said that the south generally
would be for Grover Cleveland, re-
gardless of his position on the silver
question.

Notwithstanding the ex presidents
views were known in advance of the
letter it has caused an unusual polit-
ical sensation in Washington, owing
to the fact that the southern and
western democrats are unqualified-
ly pledged to free coinage.

Washington, Feb. 12.—Last night
at the Riggs house the house coin-
age committee gave a hearing to
delegations from Philadelphia and
New York against the pending free
silver bill. Robert Peterson of
Philadelphia is a well known finan-
cial authority, and Charles S. Smith
president of the New York Cham-
ber of commerce advanced arguments
to show that free silver would drive
gold to a premium. Mr. Smith
read a letter from ex Mayor Abram
Hewitt who although a silver man
himself and a smelter of silver,
claimed to see great danger to the
country in the proposed legislation.
The republicans of the house will
caucus to-night on the silver ques-
tion.

February treats the days of the
week impartially this year. There
will be four and no more.

The Ex-Confederate Reunion.

To all Ex Confederates in Missouri
and Kansas and their friends.

We appeal to you individually to
organize yourself a committee of
one to assist in collecting funds or
ratifications for the reunion of the ex-
confederates of the state of Mis-
souri to be held in August next.
The executive committee desires to
make this reunion one which Kan-
sas City may justly feel proud of
and which will be in consonance with
her usual pluck and enterprise and
in accord with her marvelous growth
and the objects of such meetings are
to fraternize with the veterans of
the late war on both sides, devise
means to build, erect and maintain
an ex confederate home in Missouri
for our disabled soldiers, their widows
and orphans. In this work the com-
mittee heartily invites the cordial
co operation of all G. A. R. posts
in this vicinity and all their friends,
and at the proper season these posts
will receive the proper official notice
to attend in their respective bodies.

The ladies are expected to share
in this work, and at a future time the
executive committee will appoint a
committee of ladies to take charge of
their part of the labor.

R. T. DARNALL,
Chairman of Executive Com.

THE MEDICAL PROFESSION.

The attitude of the medical pro-
fession toward what is known as
"patent medicines" is not at all un-
reasonable. Thousands of these
nostrums are offered to the public
every year. Some of them are dan-
gerous and most of them are futile.
Swift's Specific (S S S), we are glad
to say is not classed among these
nostrums. It has overcome the
wholesale prejudices of physicians
in all parts of the country and some
of the strongest testimonials in its
behalf come from the medical men
who have used it in their practice
and who do not hesitate endorse its
wonderful results. This is extreme-
ly gratifying but by no means aston-
ishing, for every claim that is put
forward in behalf of S S S is based
on a series of actual experiments ex-
tended over a long period of time.

The Kansas City Journal says de-
liverately that the legislature has
succeeded after four weeks session in
passing a law restraining geese from
running at large.

Well, if it has done nothing of
more practical importance than that
and has done no harm, its record is
still on the right side. And that is
more than can be said of the republi-
can national legislature, which has
been in session most of the time
since Harrison's election, and has
done nothing but squander the peo-
ple's money and beget strife and ap-
prehensive feeling among the peo-
ple.

The restraint of geese is no small
matter either, at least to the people
of Pleasant Hill will have cause to
remember the present session grate-
fully if it really succeeds in that pur-
pose.—Pleasant Hill Local.

Windem was a "dry smoker" and
he is dead. The anti-smokers will
have an other illustrious example to
illustrate the deleterious effects of
the use of tobacco.

EXCITEMENT IN ROCHESTER.

The Commotion Caused by Statement
of a Physician.

An unusual article from the Roch-
ester N. Y., Democrat and Chroni-
cle, was recently published in this
paper and was a subject of much
comment. That the article caused
even more commotion in Rochester
the following from the same paper
shows:

Dr. John Henion, who is well
known not only in Rochester but
in nearly every part of America,
sent an extended article to this
paper, a few days since which was
duly published, detailing his re-
markable experience and rescue
from what seemed to be certain
death. It would be impossible to
enumerate the personal inquiries
which have been made at our office
as to the validity of the article but
they have been so numerous that
investigation of the subject was
deemed necessary.

With this end in view a represen-
tative of the paper called on Dr.
Henion at his residence, when the
following interview occurred: "That
article of yours Doctor has created
quite a whirlwind. Are the state-
ments about the terrible condition
you were in, and the way you were
rescued such as you can sustain?"

"Every one of them and many
additional ones. I was brought so
low by neglecting the first and most
simple symptoms. I did not think
I was sick. It is true I had frequent
headaches; felt tired most of the
time; could eat nothing one day and
was ravenous the next; felt dull
pains and stomach was out of order
but I did not think it meant any-
thing serious.

"The medical profession has
been treating symptoms instead
of diseases for years and it is high
time it ceased. The symptoms I
have just mentioned or any unusual
irritation of the water channels
indicate the approach of the kidney
disease more than a cough announ-
ces the coming of consumption.
We do not treat the cough, but try
to help the lungs. We should not
waste our time trying to relieve
the headache, pains about the body
or other symptoms but go directly
to the kidneys, the source of most
of these ailments."

"This then is what you meant
when you said that more than one-
half the deaths which occur arise
from Bright's disease is it Doctor?"

"Precisely. Thousands of dis-
eases are torturing people to-day,
which in reality are Bright's disease
in some of its many forms. It is a
Hydra-headed monster and the
slightest symptoms should strike ter-
ror to every one who has them. I can
look back and recall hundreds of
deaths which physicians declared at
the time were caused by paralysis,
apoplexy, heart disease, pneumonia,
malaria fever and other common
complaints which I see now were
caused by Bright's disease."

"And did all these cases have sim-
ple symptoms at first?"

"Every one of them and might
have been cured as I was by the
timely use of the same remedy. I am
getting my eyes thoroughly opened

in this matter and think I am help-
ing others to see the facts and their
possible danger also."

Mr. Warner who was visited at his
establishment on N. St. Paul street
spoke very earnestly:

"It is true that Bright's disease
has increased wonderfully and we
find by reliable statistics that from
'70 to '80 its growth was over 250
per cent. Look at the prominent men
it has carried off and is taking off
every year, for while many are dying
apparently of paralysis and apoplexy
they are really victims of kidney dis-
order, which causes heart disease,
paralysis, apoplexy, etc. Nearly
every week the papers record the
death of some prominent man from
this scourge. Recently, however,
the increase has been checked and
I attribute this to the general
use of my remedy.

"Do you think that many people
are afflicted with it to-day who do
not realize it, Mr. Warner?"

"A prominent professor in New
Orleans Medical college was lectur-
ing before his class on the subject
of Bright's disease. He had various
fluids under microscopic analysis and
was showing the students what the
indications of this terrible malady
were. 'And now gentlemen,' he
said 'as we have seen the unhealthy
indications, I will show you how it
appears in a state of perfect health
and he submitted his own fluid to
the usual test. As he watched the re-
sults his countenance suddenly
changed, his color and command
both left him and in a trembling
voice he said: 'Gentlemen I have
made a painful discovery; I have
Bright's disease of the kidneys; and
in less than a year he was dead.
The slightest indications of any
difficulties should be enough to
strike terror to any one.

"You know of Dr. Henion's case?"

"Yes, I have both read and heard
of it."

"It is very wonderful is it not?"

"No more so than a great many
others that have come to my notice
as having been cured by the same
means.

"You believe then that Bright's
disease can be cured.

"I know it can. I know it from
my own and the experience of thou-
sands of prominent persons who
were given up to die by both friends
and physicians.

"You speak of your own experi-
ence, what was it?"

"Fearful one. I had felt languid
and unfitted for business for years.
But did not know what ailed me.
When however, I found it was kidney
difficulty I thought there was little
hope and so did the doctors. I have
since learned that one of the
physicians of this city pointed me
to a gentleman on the street one day
saying 'there goes a man who will
be dead within a year.' His
words would have proved true if I
had not fortunately used the remedy
now known as Warner's Safe cure.

"Did you make a chemical analy-
sis of the case of Mr. H. H. Warner
some three years ago, Doctor? was
asked Dr. S. A. Lattimore, one of
the analysts of the State Board of
Health."

"Yes sir."

"What did this analysis show you?"

BRADFIELD'S

"A serious disease of the kidneys"
"Did you think Mr. Warner could
recover?"

"No, sir, I did not think it possi-
ble.

"Do you know anything about the
remedy which cured him?"

"I have chemically analyzed it and
find it pure and harmless.

The standing of Dr. Henion, Mr.
Warner and Mr. Lattimore in the
community is beyond question and
the statements they make cannot for
a moment be doubted. Dr. Henion's
experience shows that Bright's dis-
ease of the kidneys is one of most
deceptive and dangerous of all dis-
eases that it is exceedingly common
but that it can be cured if taken in
time.

Illness of Senator Voorhees.

Senator Daniel Voorhees of Indi-
ana is confined to his bed with rheu-
matism and a kind of heart trouble.
Senator Voorhees is in his four-
teenth year in the senate and has
been re-elected again for a
full term. This will complete a ser-
vice of twenty years in the senate
if he should live.

When the summers rose has faded
What shall make it fair again
When the face with pain is shaded
What shall drive away the pain
Never shall blossom brighter
After blighted by the frost
But the loss of pain may lighten
And we need not count as lost

all the pleasure of life when the wife
and mother upon whom the happi-
ness of home so largely depends, is
afflicted with the delicate disease
peculiar to women. It is terrible to
contemplate the misery existing in
our midst because of the prevalence
of these diseases. It is high time
that all women should know that
there is one sure remedy for all fe-
male complaints and that is Dr.
Pierce's Favorite Prescription. Do
not allow ill health to fasten itself
upon you. Ward it off by the use
of this standard remedy. But if it
has already crept in rout it out.
You can do it by the use of the
"Favorite Prescription." It is guar-
anteed to give satisfaction in every
case or money paid for it will be
returned.

For biliousness sick headache,
indigestion and constipation take
Dr. Pierce's Pellets.

Jefferson City, Mo., Feb. 12.—
The bill introduced by M. McLin of
Johnson co. Making it a felony to
publish in the state a newspaper
principally devoted to the printing
of crime and immorality, was pass-
ed by the house yesterday afternoon
by a unanimous vote. The bill con-
tains an emergency clause, so that
if the senate passes it, it will become
at once law.

The ill winds are seldom ever any
good to the florists. Cold tempera-
ture is againsts their trade. The
weather in Paris has been so severe
that the market for flowers was sus-
pended. One florist at Ivy lost
100,000 rose bushes and the total
loss to the rose growers, is estimated
at several millions of francs.

Fifty Spasms a Day. 1

Had Mrs. H. A. Gardner, of Vistula,
Ind., lived two thousand years ago she
would have been thought to have been
possessed of evil spirits. She was sub-
ject to nervous prostration, headaches,
dizziness, backache, palpitation and
forty to fifty spasms a day. Though having
been treated by eight physicians for
years without success, she was perma-
nently cured by one bottle of Dr. Frank-
lin Miles' Restorative Nerve. A trial
bottle of this new and wonderful medi-
cine, and a finely illustrated treatise free
at H. L. Tucker's drug store, who re-
commends and guarantees it.
